

# furniBOX®

The mobile solution for furniture warehouses

**Play it safe: no more complaints - thanks to the FurniBox®**

From the time the goods are received until they leave the warehouse: once it is securely placed on the FurniBox®, direct contact with your furniture ceases in the warehouse. In this way even the most sensitive items can be moved, stored and delivered in the warehouse safely and quickly and delivered in complete consignments – without any risk of damage.

The fact that the FurniBox® can additionally be folded up without any problem after use makes it even more attractive.

4

## → All for one?

Does everyone in your warehouse have to “lend a hand” in order to manually move a single set of furniture? Upholstered furniture is valuable and sensitive, but unfortunately also very unwieldy. This not only requires a lot of labour, but also poses the risk of damage or soiling. In short: complaints are inevitable. Have you always wanted to know how furniture transport in the warehouse can be carried out more inexpensively while making it completely safe? Then take a look to the right.

5

## → One for all! FurniBox®

You need exactly one person to move a complete set of upholstered furniture – with the special FurniBox® for upholstered furniture. Variable bars can be adapted to any furniture size. Using the FurniBox®, you move upholstered furniture effortlessly, keeping it well protected. And, of course, we don't want to conceal the fact that the FurniBox® can even be stacked three high, thus saving a great deal of space.

**Especially suitable for upholstered furniture!**

6

## → Piece chipped off?

Scratches in the elegant veneer or pieces chipped off? Does the thought of these sources of complaint make you break out in a sweat? Transporting large cabinets with sensitive surfaces is a big challenge for all warehouse staff. To make sure things run smoothly, venture a look at the FurniBox®.

7

## → Everything in one piece! FurniBox®

On a FurniBox® even the largest cabinet elements can be transported as safe as in a safe. Special spacers ensure that the elements are kept at a suitable distance from each other on the FurniBox®. In this way even the most sensitive cabinets stay smooth and flawless, no matter how confined the space.

**Especially suitable for living-room furniture!**

8

## → Looking for something?

When did you have the last complaint because a part was missing in the shipment of a kitchen or the refrigerator had a scratch? Complaints are expensive, and searching takes time and costs money. Would you like to know how your consignments can easily be kept together and you can store high-quality items so they are protected at the same time? Then simply read on.

Foto © Nobilia

9

## → Found it! FurniBox®

Perfect organization for order picking is no problem at all with the FurniBox®. All individual parts of a kitchen are simply put together on a FurniBox®. This not only saves space, but also the nuisance of searching. Since your sensitive kitchen furniture is optimally protected against damage by the side walls of the FurniBox®, complaints will soon cease to be an issue for you.

**Especially suitable for kitchen furniture!**

10

## → Enough room?

Does your warehouse burst at the seams at the beginning of summer because large lots of garden furniture are delivered? If warehouse areas are crammed full, transport quickly becomes a problem, especially when sales are going well and speedy delivery is important. Have you always wanted to know how seasonal goods can be stored in a space-saving fashion and transported without getting into a frenzy? Then take a look at how well this works with the FurniBox®.

Foto © Best

11

## → Plenty of room! FurniBox®

With the FurniBox® you are left with plenty of room, even when large volumes are in stock. The FurniBox® provides sufficient space for all garden furniture, which can thus be stacked on top of each other without any problem. When speed is important, you will especially appreciate the fact that the FurniBox® can be rolled, enabling you to move items quickly within the warehouse.

**Especially suitable for garden furniture!**

12

13

## → Stuck?

How many mattresses do you have to move to the side or restack when precisely the one all the way at the bottom or at the back is needed? No matter how many there are – there are always too many because moving the other mattresses out of the way or restacking them is laborious and time-consuming. If you have always asked yourself whether this can be done more easily, then take a look at what the FurniBox® can do for you.

## → Relax! FurniBox®

No matter how big or heavy they are – lined up neatly on a FurniBox®, even the most unwieldy mattresses can be moved in bulk without any problem. Thanks to the FurniBox®, you have quick and trouble-free access to each individual mattress or can set entire lots in motion without any effort. This means relief for your back and it saves you time.

**Especially suitable for bedroom furniture!**

14

→ Low-level warehouse

15

**Moving quickly. No more reloading. The FurniBox®.**

Storing furniture in an orderly and organized fashion and still being able to access it quickly is no longer an unfulfillable dream. The FurniBox® creates space and order in low-level warehouses and additionally makes sure that things which belong together stay together. The FurniBox® can be quickly and easily moved using any standard towing vehicle.

With the FurniBox® your consignments remain complete from start to finish. Thanks its smooth-running wheels, furthermore, the FurniBox® guarantees speedy transport within your warehouse, no matter whether manually or with an electric towing vehicle. In this way you can make full use of your warehouse space and at the same time maintain quick access even to goods in the remotest corner.

The fact that the FurniBox® is available in three different sizes makes it the big favourite for every low-level warehouse

18

→ **Block store**

19

**Stacking high. Gaining space. The FurniBox®.**

Why is the most valuable part of your block store the air above the goods? Very simply: the FurniBox® gives you the opportunity to double or even triple your storage capacity, without having to rent a single additional square metre. This is easy and very inexpensive.

Simply stack the FurniBox® with a conventional forklift two or three high and in this way make optimal use of the height of your warehouse. And the best thing about this system is that you can do without the aisles for seasonal and mass-produced articles by using the FurniBox® and store even more goods on the same area.

The fact that the FurniBox® protects your goods against damage even at dizzy heights makes it the favourite for your warehouse manager

22

→ High rack store

23

The FurniBox® is particularly well suited for the use of narrow-aisle forklifts, for which an aisle width of only 1,80 m is adequate. Furthermore, by means of an order picker, you can conveniently steer for the desired rack sites with an empty FurniBox®, remove goods stored there individually and further transport them safe and sound.

In this way you make efficient use of your rack compartments to accommodate large volumes of goods and can additionally take them out of storage quickly.

**Direct access. Even at the very top. The FurniBox®.**

High, higher, highest! With the FurniBox® you have direct and quick access to your goods, no matter how high they are in your high rack store. An especially practical feature here is that even pieces of furniture that stick out over the top edge can be kept in a FurniBox® so that bulky items, too, can be stored well protected and available at any time.

The fact that you can combine FurniBoxes® of different sizes in your high rack store makes them the perfect all-round protection for all types of furniture

26

→ Fully automatic high-bay warehouse

27

**In operation everywhere. Always safe. The FurniBox®.**

No matter how rapidly your warehouse will grow in the future, the FurniBox® grows, too. Once purchased, it can be used for all types of warehouse. The FurniBox® is perfect even for state-of-the-art computer-controlled high-bay warehouses: you can carry out up to 700 operations a day for incoming and outgoing items while keeping staff assignment low if you make use of the FurniBox® concept in your high-bay warehouse.

Besides speed and efficiency, the FurniBox® offers maximum protection for your goods, even at a height of 47 m. In this way you minimize complaints, no matter how high you aim with your furniture.

The fact that automatic reloading is carried out safely, reliably and without any problem with the FurniBox® makes it a must for every furniture high-bay warehouse.

30

→ **Mixed warehouse**

31

The FurniBox® makes this work easier and safer for you. Thanks to its smooth-rolling wheels, the FurniBox® can be moved around a low-level warehouse quickly and with little effort. A single member of the staff can manually move the FurniBox® with a load of up to 1000 kg with ease. Stacked on top of one another, it offers enormous reserve space for busy, high-volume periods and on the rack it ensures quick access to the goods at any time.

The fact that the FurniBox® protects your goods as if they were in a safe, even in hectic situations, will delight your complaints department all the more.

**Roll fast. Stack high. Anything is possible. The FurniBox®.**

How often do you have to adapt the warehousing situation in your combination store flexibly to shifts in product lines and seasonal fluctuations? Large consignments come in, others must be moved out of the way or stored for a longer period for sale in the next season. These are situations, therefore, in which a great deal of labour is required to move the goods around and the risk of damage is high.

# → Flexible

## Loading and unloading in 5 minutes? No problem with the FurniBox®.

It couldn't be any faster and easier. Without any need of reloading, your goods roll out of your warehouse on the Universal FurniBox® directly into the truck and thus optimally protected to the customer. In this way Universal FurniBox® guarantees rapid loading of trucks and safe shipment. By virtue of dimensions that are precisely geared to truck transport, the Universal FurniBoxes® can be positioned exactly next to each other on the truck floor and secure each other in this way.

## Heavy loads, uneven surfaces? No problem with the FurniBox®.

You can effortlessly transport loads of up to 800 kg with the Universal FurniBox®, even on uneven surfaces. The stable frame structure of the Universal FurniBox® and the high quality of its wheels make this possible. And so you can depend on your goods remaining undamaged when things get turbulent again, the UniversalFurniBox® is additionally equipped with solid impact protection.

## Staying on course with different types of furniture? No problem with the FurniBox®.

Any desired numbers of FurniBoxes® can be towed together as a unit with an electric truck. In this way you can move large lots of diverse items quickly and in an organized fashion both in your low-level warehouse and outdoors.

## A rack where there isn't one? No problem with the FurniBox®.

Even the smallest hut has space – this is the motto of those who put their trust in the FurniBox®. Stacked on top of one another, the FurniBox® makes use of the full height of your warehouse, even without installation of a rack system, whenever you wish.

## A transport container that "slims down" after use? No problem with the FurniBox®.

Does it bother you when transport containers just get in the way and block valuable space in the warehouse or truck until their next use? Then you should take a closer look at the FurniBox®. The FurniBox® can be folded up in no time and therefore takes up minimal space when empty. This saves room in the warehouse and freight costs for transport.

**Our proven furniture assistant: The Cordes Möbelhund®.**

In most cases the simplest inventions are the most ingenious. Our Möbelhund® is also ingeniously simple and tried and tested a million times over. Wherever a heavy or unwieldy piece of furniture has to be moved, the Möbelhund® is an irreplaceable assistant. Its sturdy beechwood bottom carries the heaviest of loads even many years after its purchase. Its smooth-running wheels enable effortless transport on all surfaces. The standard "no-trace" rubber wheels roll even on light-coloured carpeting without any black marks!

To ensure that your furniture does not start slipping even on uneven surfaces, the Möbelhund® is provided with an antiskid coating. Rubber buffers on all sides additionally act as impact protection for walls and doors. In this way the Möbelhund is perfectly equipped to avoid complaints and damage right from the start.

The Möbelhund® Europa is the noblest! Equipped with a special rubber hood, the Möbelhund® Europa is the optimal solution for any transport thanks to the rubber buffer on all sides and the extremely antislip coating.

For order quantities of more than 50 pieces Cordes® customers receive the article with their name imprinted on it.

→ The Möbelhund®

**We plan for you. Cordes – your specialist for furniture logistics.**

Planning a warehouse in such a way that it precisely meets one's own requirements and also takes into account future growth without great modifications is not an easy matter. Our specialized Planning Service makes it particularly easy for you.

We advise you on optimal utilization of your storage space with equal competence as in the selection of appropriate racks or electric transport equipment for your warehouse.

With the FurniBox® you not only get a tried and tested transport unit for your furniture, but also all important information on setting up your warehouse. By means of a special computer program, we develop jointly with you a layout that is tailored to your specific needs. Simply send us a ground plan and we will supply you with the perfect layout.

Put us to the test and profit from over 40 years of experience in furniture logistics.

## → Warehouse planning

**Behind every strong brand is a strong manufacturer.**

There are 40 years of manufacturing competence behind the FurniBox®, Cordes' core product for furniture logistics. For our customers this means: Cordes stands for perfected high-quality products and qualified consulting in the entire field of transportation and storage of furniture.

We produce exclusively in the EU and guarantee the top workmanship of every single FurniBox®. By virtue of meticulous quality control, we ensure that only flawless products are sent on their way to you. Furthermore, the refined Cordes logistics system always guarantees rapid and smooth delivery.

→ **This is Cordes**

## → Personalization

**Just the way you want it. The FurniBox®.**

No matter whether you want the FurniBox® narrower or wider, higher or deeper or in a special colour. You get it tailored precisely to your warehouse. The FurniBox® is not only available in any dimensions, but complete special designs on demand are also no problem at all. In addition, you can choose the side walls of your FurniBox® in different mesh sizes and adapt them individually to the desired type of loading in this way. The numerous well thought-out accessories, which Cordes has developed specially for the FurniBox®, make the FurniBox® even more efficient and the organization of your warehouse child's play.

### Customized products and special designs?

No problem – Cordes has the matching production capacity and optimally trained specialists. With the FurniBox® you and your customers profit from the flexibility of an experienced manufacturer. Moreover, the high-quality paintwork can, of course, be applied in any colour you wish. With the FurniBox® you and your customers profit from the flexibility of an experienced manufacturer. In addition, the 3-year manufacturer's warranty vouches for the high quality of the FurniBox®. This means Cordes is your competent partner you can contact at all times.

Get in touch with us. We look forward to hearing from you.
